From: Director

Subj: MARINE CORPS LOGISTICS COMMAND WORKFORCE REPORT

1. The first *Marine Corps Logistics Command Workforce Report* provides a summary of events that have helped shape our workforce and a workforce profile as of March 2006. This information begins to build workforce demographics we need to move forward in investing in human capital/workforce management and development.

2. Our intent is to provide you with information that will be useful as we determine our workforce requirements and resources for today and tomorrow. If there is something missing that you would like to see, please let me know. And, if there is some piece of information you find particularly useful, please let me know that also so that we can expand on it in future reports.

C. A. SUBER

INTRODUCTION

As we began Fiscal Year (FY) 2006, the Marine Corps Logistics Command (LOGCOM) Headquarters faced several workforce management issues:

- We were under-executing our Full Time Equivalents.
- Our Table of Organization (T/O) showed more hardline billets than we were authorized on the Letter of Allowance (LOA).
- We faced reductions in our LOA for FY 2007.
- We had numerous overhire billets on the T/O to satisfy permanent manpower requirements.
- We had identified requirements for additional positions.

A solution to any one of these issues impacts the others.

The G-1 took the first steps in reviewing and monitoring LOGCOM Headquarters' vacant billets by removing billets from the Departments'/Offices' T/Os that were vacant for an extended period of time and placing them in a Command reserve account to be prioritized for future requirements. The G-1 also began to create a timeline to depict the various stages of recruitment. Directors began reducing direct overhire billets by using vacant direct hardline billet authority to offset existing overhires or not filling existing overhires when they became vacant.

Table of Organization maintenance itself had some problems. Various versions of the T/O were being maintained throughout the Command. The G-1, working with the Command, Control, Communications and Computers Department (C4), began the development of an Oracle web based tool to provide the Command with one source of T/O data that can be updated and viewed by each organization. This tool, the Workforce Requirements and Resources Integration Tool (WRRIT), was deployed to LOGCOM Headquarters organizations on 5 April 2006. Further enhancements and deployments are being planned for later this fiscal year.

LOGCOM continued the recruitment process to fill the FY 2005 military to civilian conversions that were not executed during FY 2005. The deadline to have all FY 2005 conversions staffed became a moving target going from 30 September 2005 to December 2005 and then to June 2006. As of December 2005, LOGCOM Headquarters had filled all approved military to civilian

conversions. LOGCOM Headquarters was approved for four conversions for FY 2006; however, those billets were realigned to Marine Corps Logistics Base (MCLB), Albany as part of the regionalization effort. Blount Island Command plans to have all conversion billets filled by June 2006.

The T/O change request (TOCR) that set the stage for billet realignments in support of the regionalization effort to stand up the Marine Corps Installations East and West was submitted to Marine Corps Combat Development Command (Total Force Structure Division) in June 2005. It was approved via a letter dated February 2006.

While LOGCOM has continued to source Individual Augmentees and Liaison Officers, the permanent staffing of our military billets is an on-going effort. Working with LOGCOM organizations, MCLBs Albany and Barstow, Marine Corps Systems Command and Manpower and Reserve Affairs, Marines have been realigned between organizations and Commands to meet mission requirements. LOGCOM's overall staffing numbers meet current military staffing goals; but, the overall breakdown by Military Occupational Specialty (MOS) presents a different picture. LOGCOM is overstaffed in some MOS's and short in others, particularly with Supply Administrators (MOS 3043). The Command is currently 16 Marines below staffing goal for 3043's with the biggest deficiency in the Sergeant ranks. The G-1 works with the military monitors on a continual basis to resolve shortages throughout occupational specialties.

Significant Events

A. Workforce Requirements & Resources Integration Tool (WRRIT)

WRRIT is an Oracle web based tool that allows automated collaboration and enables organizations to manage a database of information that integrates T/O requirements and resources. WRRIT replaces the numerous individual tools used by LOGCOM organizations to manage the local working versions of the T/O with an integrated one-source, one-view T/O for all of LOGCOM. WRRIT allows Command-wide access to up-to-date data and reports. The G-1 began using WRRIT 1 February 2006. Deployment to LOGCOM HQ organizations began 5 April 2006 with further enhancements and deployments being worked for later this fiscal year to include Blount Island Command and Maintenance Centers Albany and Barstow.

WRRIT provides users the ability to:

- update organizational and billet structure
- manage personnel resources
- access essential information quickly and easily
- create accurate, up-to-date reports

B. Executive Deputy Direction

During December 2005, the Executive Deputy issued two letters that established direction for processing selection certificates and reducing direct overhire billets. This guidance remains in effect. The subject letters are as follows and are contained in Appendix A:

- 21 Dec 05 Recruit/Fill Selection Certificates Held Over 30 Days
- 21 Dec 05 Reduction of Direct Funded Overhire Positions

C. Military to Civilian Conversions

As of 30 September 2005, LOGCOM HQ had not filled all of the approved FY 2005 military-civilian conversions. The following chart depicts the status for 30 September 2005 and 31 March 2006.

Organization	Authorized	Filled 30 Sep 05	Filled 31 Mar 06
Office of the Adjutant	1	1	1
SCMC	1	0	1
C4	*10	6	10
P&R Dept	1	1	1
BICmd	18	3	3
Total	31	11	16

* Two of the 12 conversions approved for C4 were realigned to MCLB Albany as part of the Regionalization effort.

Four billets were approved for Fiscal Year 2006 conversion in the C4 Department. Those billets were realigned to MCLB Albany as part of the regionalization effort. At this time, LOGCOM HQ has no approved conversions for Fiscal Year 2006. It is possible that conversions could be assigned to the Command at a later date due to Marine Corps wide conversion efforts.

D. Regionalization

Billet realignments between LOGCOM Headquarters and MCLBs Albany and Barstow were required to position LOGCOM for the 5th Element of the Marine Air-Ground Task Force (MAGTF) Transformation. A LOGCOM Regionalization Operational Planning Team (LR OPT) was established with representatives from across the command to include the Headquarters element, MCLBs Albany and Barstow and Maintenance Centers Albany and Barstow.

The purpose of the OPT was to assess the impact of base regionalization on critical LOGCOM missions and to facilitate coordinated and unified planning for an orderly transition to a regional base structure. The mission of the OPT was to review internal organizational roles and responsibilities, identify potential realignment conflict of interests and make recommendations to the Commanding General, LOGCOM.

The following charts detail the actions that were requested through the TOCR process to implement the realignments identified by the LR OPT.

Billets Realigned from LogCom HQ to MCLB Albany	Reason	Ofcr	Enl	Civ	Total Billets
From C4	IT	1	8	12	21
From FSD Albany	Retail Supply	0	0	19	19

Billets Realigned from MCLB Albany to LogCom	Reason	Ofcr	Enl	Civ	Total Billets
From Band	Band	1	50	0	50
From Battalion	Stand up of LogCom HQ Company; decision reversed	0	0	0	0

Billets Realigned from MCLB Barstow to LogCom HQ	Reason	Ofcr	Enl	Civ	Total Billets
MCB chargeable billets	Realign MCB chargeable billets to LOGCOM	5	3	904	912
MCB mob billets	Realign MCB mobilization billets to LOGCOM	0	1	310	311
FSD (less Retail Supply)	Realign FSD Barstow chargeable billets to LOGCOM (SCMC)	4	40	84	128
FSD mob billets	Realign FSD Barstow mobilization billets to LOGCOM (SCMC)	9	313	231	553
Counsel billets	Realign Counsel Office billets to LOGCOM	0	0	3	3
Contracts billets	Realign Contracting billets supporting MCB to LOGCOM	0	0	2	2

Billets Realigned from FSD Barstow To MCB	Reason	Ofcr	Enl	Civ	Total Billets
From Retail Supply	Retail Supply billets were on MCLB Barstow T/O; decision reversed	0	0	0	0
Retail Supply Billets to Remain On MCLB Barstow T/O	Issue	Ofcr	Enl	Civ	Total Billets
From Retail Supply	Retail Supply billets were on MCLB Barstow T/O	0	0	24	24

Source of Data: T/O Change Requests submitted to Marine Corps Combat and Development Command

E. Deployments

LOGCOM's deployed personnel have included military, civilians and contractors. The purpose of the deployments is to serve as Liaison Officers, support Individual Augmentee requirements and perform work in support of the LOGCOM mission. Over the last several months, the Command averaged approximately 110 personnel, mostly civilians and contractors, deployed in support of current operations.

F. Commanding General's Strategic Offsite

The Commanding General's Strategic Offsite was conducted 22-24 February 2006 and identified five strategic actions required to achieve the Commanding General's intent. One of those actions is to "invest in human capital/workforce management and development" which calls for LOGCOM to improve its existing skill sets or acquire new skill sets that the LOGCOM workforce may not possess today. Several actions were identified to begin this fiscal year and continue into FY 2008 that will focus on identifying those skill sets and implementing a plan to develop them.

Phase I (FY 2006)

- Identify knowledge and skills requirements for how processes contribute to mission accomplishment
- Conduct assessment of:
 - o Current lifecycle management skill sets
 - o Internal market research skill sets
 - o Internal 4PL skill sets

Phase II (FY 2007)

- Develop, implement and conduct education and training on lifecycle management and end-to-end processes
- Develop strategic roadmap for acquiring the lifecycle management skills, market research skills and 4PL skills required
- Execute roadmap

Phase III (FY 2008)

- Refine and sustain lifecycle course

Marine Corps Logistics Command Workforce Profile

This portion of the report provides a snapshot of the workforce profile in terms of size, grade, occupation and other selected demographic characteristics as of March 2006.

Chart A. Number of Military and Civilians

Source of Data: HRSC, SE EEO Alpha Listing March 2006

LOGCOM HQ military and civilian numbers include FSDB.

These charts represent the number of on-board employees for LOGCOM as of March 2006. The total of military and civilian personnel is 3,263. The civilian numbers include senior executive service, general schedule, federal wage, permanent, temporary, term, direct and reimbursable employees. The military numbers include authorized and overstaff.

Chart B. Number of General Schedule Civilians

LOGCOM HQ includes FSDB.

Source of Data: HRSC, SE EEO Alpha Listing March 2006 and FSDB T/O of March 2006

Chart C. Average Grade of General Schedule Employees

Source of Data: HRSC, SE EEO Alpha Listing March 2006

LOGCOM HQ includes FSDB.

The average grade for MARCORLOGCOM is 9.9.

Chart D. General Schedule Distribution by Series
